Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Response to Amendment

1. This office action is in response to the amendment submitted on 20 November 2006. Claims 1-31, 39 and 45-61 are canceled. Accordingly claims 32-38, 40-44 and 62-64 are currently pending.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 32-38 and 62-64 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In the independent claims the phrase "selected from the group consisting of....or a combination thereof" is improper Markush terminology and thus the claims are indefinite. The phrase should be changed to -- selected from the group consisting of....and a combination thereof -- which is proper terminology.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 32-38 and 62-64 are rejected under 35 U.S.C. 103(a) as being unpatentable over Wang et al (US Patent No. 6,569,349 B1) in view of Schroeder et al (US Patent No. 6,936,543 B2), Li et al (US Patent No. 7,037,351 B2) and Chamberlin et al (US Patent No. 7,052,635 B2).

Schroeder et al (US Patent No. 6,936,543 B2) teaches, in column 10, lines 35+, that it is well known in the art to utilize sulfuric or nitric acids to adjust the pH in CMP systems.

Li et al (US Patent No. 7,037,351 B2) teaches, in column 8, lines 28+, that it is well known in the art to utilize sulfuric or nitric acids to adjust the pH in CMP systems.

Chamberlin et al (US Patent No. 7,052,635 B2) teaches, in column 3, lines 26+, that it is well known in the art to utilize sulfuric or nitric acids to adjust the pH in CMP systems.

Applicant argues that the instant claims are not rendered obvious by the Wang et al reference (US Patent No. 6,569,349 B1) as it fails to teach or fairly suggest the use of sulfuric acid or nitric acid and therefore the instant claims are not obvious over the reference.

It is the position of the examiner that since it is well known in the art to utilize sulfuric or nitric acids to adjust the pH in CMP systems as exemplified in the above references it would have been obvious to utilize these acids to adjust the pH in the composition of Wang et al (6,936,543 B2) particularly in view of the fact that Wang et al (6,936,543 B2) teaches in column 6, lines 10+, that pH adjusters other than those specifically taught may be used to adjust the pH of the composition. Accordingly one of

ordinary skill in the art would have found it obvious to utilize sulfuric and/or nitric acid in the composition of Wang et al 6,936,543 B2) without producing any unexpected results absent a showing otherwise as such is suggested by Wang et al 6,936,543 B2).

Therefore the instant claims are prima facie obvious over the combination of references.

Allowable Subject Matter

6. Claims 40-44 are allowable over the art of record as the prior art fails to teach and/or fairly suggest the instant claimed compositions.

Conclusion

7. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP

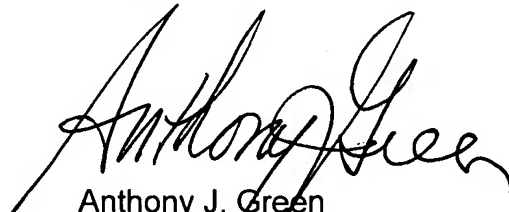

§ 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
